

How do you pay for webCAT transactions?

WebCAT offers several secure and easy-to-use payment options. You can choose to pay for transactions either by credit card, ACH credit or ACH debit. If you prefer, you can pay your IFTA taxes via mail! If you choose not to pay your taxes when you file your quarterly tax report using webCAT, DMV will mail you an assessment notice for the tax due amount.

How can webCAT benefit you?

DMV worked directly with the motor carrier industry to design webCAT. WebCAT is user friendly with easy-to-understand instructions that help you process any type of transaction quickly and accurately. Based on motor carrier input, several features were built into the system. For example, webCAT makes account maintenance easy by maintaining your fleet information. webCAT saves you time by eliminating the need for you to complete forms, to visit a DMV customer service center or to mail your transactions.

Did you know?

DMV offers an electronic service to process your IRP and IFTA transactions? Also, did you know that you can now apply for and receive your credentials electronically? In addition, did you know that you can file your quarterly tax reports and submit your payments direct from your office? Well, you can — and the service is free! Read on to learn how to sign up and how you can use DMV's web-based Carrier Automated Transaction (webCAT) system.

What is webCAT?

WebCAT provides the motor carrier industry with a way to conduct transactions electronically. Using a personal computer and the Internet, carriers can apply and receive titles for their vehicles, International Registration Plan apportioned license plates, International Fuels Tax Agreement (IFTA) decals, and can even submit their quarterly IFTA tax reports. The system is easy to use and does most of the work for you! Most important, this service is free!

How do you become a webCAT user?

It's easy to sign up to become a user. Just go to www.dmvNOW.com. In the menu on the left, click webCAT (located under Commercial Services).

To become a user your company must base its IRP and IFTA accounts in Virginia and already have an established account. You will use your IFTA and/or IRP account number(s) to complete the easy "Sign Me Up" steps. To protect your privacy and provide your account with total security, you will be asked to pick a unique user name for your account.

Once you complete the sign-up process, DMV will send you a letter acknowledging your request to become a webCAT user and will also provide you with a unique password. To further protect your privacy and provide your account with total security, the first time you enter your name and password on webCAT, you will be required to create a new password. This method of password protection ensures that no one but you can access your information.

What services can webCAT provide to you?

WebCAT allows you to process the following transactions.

- Vehicle Titles
- IRP Apportioned License Plates - you can renew your fleet, add new jurisdictions, add new vehicles, and transfer license plates. DMV will even store your entire fleet on the webCAT system to make processing easy — all you need to do is select the vehicle and tell the system what type of transaction you want to perform!
- IFTA credentials - you can apply for your decals
- IFTA Tax Filings - you can electronically file your quarterly tax filings. All you have to do is enter your miles and fuel purchases for a particular quarter and webCAT will complete the calculations for you!

DMV has even made it easier to obtain your credentials. Based on your choice, you can choose to have your apportioned license plates, IFTA decals, and titles mailed directly to you OR you can pick them up from a DMV customer service center!
